Fluid Kinetics Rental Silencers For Temporary Blow-down

Need a portable solution for temporary blow-down at the project site? Fluid Kinetics offers an array of pre-fabricated silencer modules to match your requirements. We offer the following possibilities.

- In most cases available for immediate shipment to site
- Transportation to and from site
- Short or long term rental agreements available
- No inventory to carry - just rent and return after use
- Compact designs for portability
- Flanged or welded connection adaptable to wide range of pipe sizes
- Integrated skid support for ease of field installation
- Easy access to clean accumulated debris
- Ability to handle large flows by attaching multiple silencers in series
- Modular noise absorptive package and multi-stage diffuser design to match noise requirements
- Water injection not required for noise reduction purpose
